

Underground Utilities Construction Inspector School Bloomington, MN Location

The Underground Utilities Construction Inspector School has been developed by the Minnesota Chapter of the American Public Works Association to provide trained and knowledgeable construction inspectors for underground infrastructure construction to ensure the quality and longevity of newly constructed utilities. The content was developed by public works professionals with experience in underground utility construction and maintenance.

The school is designed to provide practical information to enable people with underground utility inspection responsibilities to expertly and confidently do their jobs. The instructors for each course topic will be experienced professionals in each area. Registration is limited to 25 to provide an excellent learning opportunity for all participants.

Web Site

Registration form and UUCIS brochure are online at <http://www.apwa-mn.org>

Designed For:

Municipal inspectors, consultant inspectors, graduate engineers, engineering technicians, and utility operators

CEUs

Participants who complete all sessions of this school will earn 3.2 CEUs.

The UUCIS also qualifies for 16 contact hours towards MDH License Renewal requirements.

The UUCIS also qualifies for 20 indirect contact hours with the Minnesota Pollution Control Agency.

Registration and Fee

Registration deadline is September 18, 2020. Class size is limited to 25 students.

The registration fee for this school is \$495 and includes instruction, materials and refreshments. Refunds, minus a \$30 cancellation fee, will be issued to participants who provide a written request by October 9, 2020. The APWA-MN Chapter reserves the right to cancel the school if necessary, in which case a full refund would be made.

The fee may be made in two payments, one with the initial registration and one prior to the February 12, 2021 session.

The number of registrations from any one organization may be limited to ensure a diverse class membership.
